With over 35 years of expertise and scientific research, LPG® created endermologie®. Inspired by manual massage, this technique delivers a mechanical stimulation on the skin's surface to naturally reactivate sleeping cells, with no risk.

With great respect for tissue, the transformation operates from within for a smoother, more radiant skin, for a toned and harmonious figure.

ENDERMOLOGIE®

FAQ

WHAT IS AN ENDERMOLOGIE® SESSION LIKE?

After a personalised assessment, the LPG® expert establishes a treatment programme to suit your goals.

Once settled on the treatment table the therapist delicately massages your entire body or face. You just need to sit back and relax!

For perfect hygiene and to guarantee treatment quality, it is recommended to put on a specific treatment suit (endermowear™) for body treatments and to use a personal face endermologie® kit.

ARE THE RESULTS LONG-LASTING?

For optimal efficiency, it is recommended to begin with a starter phase including several sessions per week for a month. After that, one session per month is all that is necessary to maintain and optimise results.

Just like exercising, endermologie® treatments become part of your lifestyle. A beauty routine to adopt all year round!
